

Stage I Frontier Advancement

- Aligned restatement construction
- Compact view + budget reinvestment
- Exposure audit (33,431 hits → 0)
- Adapter-aware loader repair
- Stage I endpoint: Overall 42.024

Stage II Principle Discovery

- Scalar data value rejected
- Relation-typed installation verified
- Same-window causal locality
- Target must be cheapest explanation
- 5 failed routes as knowledge

Knowledge flow →

Stage III Principle-Guided Advancement

- Dense 2nd-view mask + sparse labels
- Ordinary-mask parent preservation
- Dense-view KL control confirms
- Stage III endpoint: Overall 42.246
- Two-seed replication: 42.232
