

Independent studies: distinct questions, controls and scope

### Experience & training

Compression & coverage  
Fixed-budget substitution  
Architecture & optimization  
Training dynamics

### Relations & computation

Sparse anchors  
Shared representations  
Identity interfaces  
Storage & addressing

### Comparison & measurement

Matched initialization  
Matched targets  
Item-level changes  
Data & model identity

Solid: model and material inheritance

Dashed: links between questions and design
